

## Complete Packaging Solutions

### We Love Innovations

Established in the year 2009, ARS Rotoprints is a prominent flexible packaging company based in Faridabad, Haryana. ARS Rotoprints was founded & directed by Mr. Rahul Gupta & Mr. Akhil Jain. We are dealing with manufacturing & trading of finest quality of rotogravure printed flexible packaging material. The packaging material is designed with high quality, which are acknowledged for its strength, effectiveness, temperature control factors, purity, durability & weather resistance.

An extensive knowledge & rich experience in packaging sector have allowed us to create perfect product solutions to satisfy our esteemed customers of various industries like Food, FMCG, Pharmaceutical, Cosmetics, Confectionery etc. Our infrastructure is well equipped with high technology modern machinery to produce the products in accordance to the company's norms.

We have a team of professionals that are highly experienced & work in coordination with each other towards the achievement of the set goals. The process of work included various stages.

The management of the company pays much attention to the customer's requirement as customer satisfaction is our main motto. We are specialized in immediate response, prompt service & on-time delivery.

Specialist in Packaging Solutions

## Infrastructure

Our state of the art setup is a one stop for all printing and packaging solutions. We believe that infrastructure and technology are must to meet high standard of quality that fulfil every customer's needs. Our Machinery has been acquired to provide all kinds of multi-coloured and multi-dimensional printing and packaging.

Our machineries contain the different types of printing, Lamination, Slitting, Pouching, Doctoring Machines as well as machines with different type of testing equipment. Some of them are mentioned below.

### PRINTING

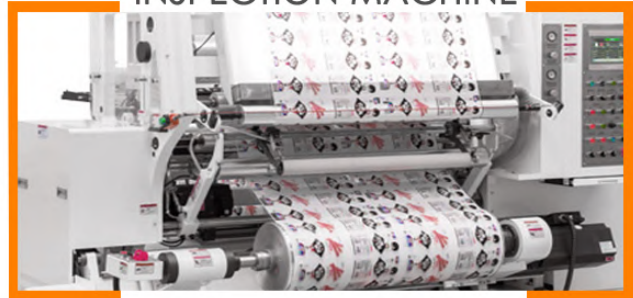

We have different types of rotogravure printing machines which are best suited for quality aspiring run jobs. A compact but fully loaded and well equipped, technology woven but easy to operate and cost-effective printing machine is equipped for high quality gravure printing with minimum wastage to its contribution.

In addition these kind of printing machines offer a range of in-line processes such as sealant coating with two or three layer lamination. The modular design of these machines enables effective integration of multiple in-line processes.

The importance of inspection machine in packaging cannot be underestimated. Of course it depends on what materials and packaging methods are used, but generally, defects threaten to compromise the integrity of parts and products, and they can undermine performance.

There is always a room for mistakes to occur – and we all know that mistakes can be very costly. That's why ARS ROTOPRINTS is an excellent option for packaging solutions. We usually do close inspection of all packaging products as well as in processes inspections so that packaging must be defect-free.

### INSPECTION MACHINE

### LAMINATION

As the leading manufacturer of flexible packaging solutions in India, ARS has in-house facilities in executing both solvent-free and solvent based lamination techniques.

Depending upon the requirement of the customers, we ensure the fastest and the most consistent levels of performance. This advanced process allows us to achieve high quality laminates for a variety of substrates including technically demanding composite bases that are a norm in the current flexible packaging trends.

ARS has capability to produce laminates for different product applications.

## SLITTING MACHINE

For advanced slitting and finishing ARS is lined up with five slitting and finishing machines with speed upto 650 mts/min and capacity of slitting coils upto 30mm.

The lines also feature turret slitters with auto trip functionality and air and cutting sheer cutting provisions as per the requirements.

## POUCHING MACHINE

In the endeavor to be the finest flexible packaging company, ARS has ensured that the production facilities offer the ensemble of solutions to the customers. We understand that packaging needs vary from product to product and application to application.

For pouching requirements, we have an assorted mix of over a dozen pouching machines that offer a variety of seals to produce :

- Centre Seal Pouches
- Three Side Seal
- Zip lock Pouches
- Standup Pouches
- Gusseted Pouches

With the provision of these systems, ARS meets a gamut of requirements to ensure the customer efficiency by sealing more than a hundred pouches per minute.

## Dynamic & Innovative Solutions

## Markets

Our flexible packaging products are used across a diverse range of industries. Whether it's snack food, Personal care, pharma or agriculture packaging, we have the expertise to help customers determine what kind of packaging works best for their unique market.

### FOOD & BEVERAGES PACKAGING

The food and beverage markets represent the largest consumption in group for packaging materials. ARS ROTOPRINTS provides the cost effective, durable and sustainable packaging solutions to different type of food and beverages packaging. There are different kinds of products in food industry are like dairy and cheese, snacks, cereals and other dry foods, meats and seafood, and ready-to-eat meals.

ARS ROTOPRINTS uses the packaging materials which protect the flavour and quality of all kinds of food and beverages, while helping reduce packaging waste and spoilage, all at an affordable cost.

### PERSONAL CARE PACKAGING

Beauty and personal care packaging is expected to continue performing well over the forecast period. The increasing focus on personal grooming and hygiene among consumers will remain a key driver of demand for beauty and personal care products. At ARS ROTOPRINTS we can create modern and functional packaging that will look after your brand.

We can readily develop a custom solution to differentiate your brand through the use of custom colours and material selection. Our personal and home care packaging solutions are certified for the transportation of hazardous substances and with the addition of tamper evident and/or child resistant closures these containers help keep your product secure. The all so expensive cosmetics are a must need for people of all ages and tastes regardless of their cost these days. Our personal and home care packaging has excellent durability, and use of best quality materials to restrain environmental moisture has been done. We are expertise in hygienic functional pouches for all kinds of cosmetic products.

### PHARMA PACKAGING

We are one of the best suppliers of a wide range of packaging solutions for pharmaceuticals. It doesn't matter whether the product to be packaged is in solid, liquid, cream or powder form – we offer solutions for all of them, and if it doesn't exist yet, we will develop it for you. We provide the pharmaceuticals packaging which provides the whole different level of the safety, security and compliance. We always try to offer comprehensive, creative, and cost effective Pharmaceutical packaging to our customers that look attractive and act as a moisture barrier for medicinal products.

### AGRICULTURAL PACKAGING

For farms to provide fresh fruits and vegetables to local consumers as well as to export to other countries, they needs to be delivered in a way that maintains the freshness, quality and taste of fruits, vegetables and dairy products while it is transported.

Agricultural packaging is even more important considering that major percentage of wasted food is lost during the production process, post-harvest treatment procedures or in storage and transportation. Packaging within the agricultural industry helps to preserve and protect food; it should also be cost effective for shipping. However, utilizing the right agricultural packaging is crucial to delivering the freshest, best-looking and most cost-effectively agricultural products.
